BEST NUTRITION FOR MORE MILK YIELD

NutriSigma

FEED NUTRITION BOOSTER

BEST NUTRITION FOR MORE MILK YIELD

NUTRISIGMA is a pH balanced animal feed nutrition booster formulated with Bypass Protein, Bypass Fat, Chelated Minerals, Micro and Macro Elements, Enzymes, Prebiotics and Probiotics.

REGULAR FEEDING OF NUTRISIGMA HELPS IN

- Sustained milk yield over longer period
- Increased milk production
- Improvement in FAT and SNF content in milk
- Improved digestion
- Improved body condition
- Shining skin
- Increased immunity power
- Improvement in reproductive efficiency
- Prevention from infertility
- Helps to improve hoof strength and durability

Available in 1, 3 & 5 Kg

Adequate supply of Protein, Fat, Calcium, Phosphorous and Vitamins to dairy animals is vital for improving milk yield.

Nutrisigma provides these nutrients along with micronutrients such as Copper, Cobalt, Selenium, Zinc, Manganese, Magnesium, Iron etc, which help in improving and sustaining milk production over a long period.

Milk quality improves, in turn, increasing Fat and Protein content.

Nutrisigma contains high percentage of Bypass Protein and Bypass Fat which are easily assimilated by dairy animals.

In addition, it contains a high amount of Vitamins A, D3, E and B Complex, which help in improving the quality of milk.

Balanced nutrition with Fat, Protein and Micronutrients is essential for improving Body Condition Score, health and weight.

Nutrisigma provides Protein, Fat, Vitamins, Calcium, Phosphorous and other nutritional elements which help in improving health and body weight of animals. Regular consumption by animals leads to shining skin which indicates improved health.

Calcium, Phosphorous and Vitamin D3 in Nutrisigma help in prevention of milk fever and other diseases.

Scientific studies have shown that 27% of reproductive problems in cattle are caused by inadequate nutrition.

Nutrisigma provides sufficient amounts of Vitamins, Proteins, Stress Minerals and other nutrients which improves fertility. It is also helpful in preventing infertility.

Immunity of animals is dependent on adequate supply of Vitamins and Minerals. Nutrisigma provides 70% of Vitamin A, D3 and E requirement along with other vitamins.

It also contains Cobalt, Selenium, Zinc, Iron and other micronutrients which improve immunity.

60% Protein content of Nutrisigma is Bypass Protein, which can be easily digested by animals. This helps in improving health and increasing milk yield.

Nutrisigma's pH balanced formula helps control acidity and gas formation in the animal's gut and improves digestion.

Nutrisigma Cattle has been shown to improve dairy production, hoof strength and durability
