More Nutrition, Increased Productivity

For more information, please call 1800 123 2393

*As per experimental study conducted at Naihati, West Bengal

HOW DOES IT WORK?

- Improved FCR
- Reduced mortality
- Faster growth, more crop cycle
- Fetches a better price, since the harvested fish is more appealing

- Antibiotic-free chemical-free formulation
- Enhances growth of natural plankton
- Helps maintain water quality, pH balance
- Lowers wastage, smell attracts fish to feed

- Fit to be mixed with any kind of feed as a protein ingredient—conventional as well as pelleted feed
- Easy to use
- Technical support with IFB Aqua Shop

HOW DO I USE IT?

MIXING DIRECTIONS

Daily—10 g NUTRISIGMA per kg of feed (10 kg per MT of feed)

Weekly—10 g NUTRISIGMA per acre, as spread, for promotion of plankton growth

During Pond Preparation—Apply 20 kg per acre of pond

FEEDING SCHEDULE FOR 1,000 CARPS GROWOUT REARING

FISH WEIGHT (g)	SURVIVAL (%)	BODY WEIGHT (%)	DAILY FEED (kg)	NUTRISIGMA (g)
50–75	100	6–5	3.0–3.4	30–34
75–100	90	5–4	3.4–3.6	34–36
100–200	90	4–3	3.6–5.4	36–54
200–300	90	3–2.5	5.4–6.8	54–68
300–450	90	2.5–2	6.8–8.1	68–81
450–600	90	2–1.6	8.1–8.6	81–86
600–1,000	90	1.6–1	8.6–9.0	86–90

NOTE Stocking density varies between 2,500–4,000/acre
